Software Engineering student with hands-on interest in AI driven solutions, fullstack development, compilers, and secure software engineering.

EDUCATION

JSS Academy of Technical Education(VTU)

Bachelor of Engineering in Information Science (8.2gpa)

Bengaluru, Karnataka

Aug. 2023 – May 2027

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks & Libraries: Spring Boot, React.js, FastAPI, LangChain, LangGraph

AI & ML: GenAI, RAG, MCP, Prompt Engineering, AgenticAI, LLM Orchestration

Databases & Cloud: MySQL, PostgreSQL, MongoDB, Redis, AWS (EC2, S3, CloudFront), Azure

Tools & Technologies: Docker, Git, REST APIs, Vector Databases (Qdrant, ChromaDB)

Core CS: Data Structures and Algorithms, DBMS, Operating Systems, Object Oriented Programming, Computer Networks

EXPERIENCE

Open Source Contributor

AgentScope Java Framework

Remote

Present

- Contributed to **AgentScope Java**, an agent orchestration framework for building multi agent systems and LLM integrations.
- Implemented **strict mode configuration propagation** across tool registration paths (annotation based, schema based, and AgentTool implementations) to ensure consistent API contract validation.
- Added backward compatible strict mode accessor in AgentTool, resolved tool schema preservation issues in SchemaOnlyTool wrapper, and added regression test coverage for schema propagation flows. [PR 1274 merged](#)

PROJECTS

NEXUS | React, TypeScript, Java, Spring Boot, MongoDB, AWS, GitHub Actions [Live](#)

- Built a **college wide platform** to manage **clubs, events, and memberships** with **microservice architecture** and role based access control.
- Developed features for **event scheduling, member applications, and notifications** with separate dashboards for admins and members.
- Designed a **scalable cloud architecture** using **AWS EC2, S3, CloudFront, and Redis caching** and implemented a **CI/CD pipeline** via **GitHub Actions** for automated deployment.

AyuMitraAI | React, FastAPI, Python, LangChain, LangGraph, Gemini, Qdrant, FireCrawl, RAGAS [GitHub](#) | [Live Demo](#)

- Built an AI powered healthcare platform with **multi agent LLM workflows** for symptom analysis, patient triage, doctor specialization matching, and follow up using **LangChain** and **Gemini APIs**.
- Developed a **RAG based prescription system** processing medical PDFs via **Qdrant** vectorDB with **real time web scraping** using **FireCrawl** to extend doctor discovery beyond internal databases.
- Designed **FastAPI** backend orchestrating **multi agent workflows** and implemented **RAG evaluation pipeline using RAGAS** to measure retrieval faithfulness, answer relevancy, and context precision.

VidyutSeva | React, FastAPI, AgentScope, LangGraph, Groq, Qdrant, Vapi, Supabase [GitHub](#) | [Demo](#)

- Built a **citizen centric power outage platform** replacing static IVR systems with **Vapi Voice AI**, orchestrating a **4 agent AgentScope pipeline** (Location, Outage, Diagnosis, Escalation) for real time fault detection and automated lineman dispatch via outbound calls.
- Designed **RAG based semantic search** using **Qdrant** to correlate fragmented citizen reports and historical BESCO records, with **smart crowd detection** triggering system alerts when 3 plus verified reports cluster in an area within 30 minutes.
- Implemented **real time data ingestion** via **FireCrawl** for BESCO maintenance scraping and **RapidAPI Twitter Sentinel** parsed by **Groq Llama 3.3**, feeding a live outage heatmap dashboard built on React Leaflet.

AWARDS & RECOGNITION

- Secured 3rd Place (Track 3) in the [IndiaAI Impact Gen-AI Hackathon](#) organised by **Indian Institute of Science Bengaluru, IBM and Cisco**.
- Selected as a **Top 24 Finalist** out of **5,600+** teams and **22,000+** participants in the **Cognizant Technoverse Hackathon 2026**.
- Recognized as a **Level 6 (Super Contributor) in Open Source** at [Hacktoberfest](#), contributing to multiple repositories like ServiceNow, TheAlgorithms etc.

CERTIFICATIONS & ADDITIONAL INFORMATION

- **Languages:** English (Professional), Kannada (Native), Hindi
- **Volunteer Experience:** Served as a [Google Student Ambassador](#), conducted coding workshops for juniors, and promoted developer community initiatives.
- [Oracle Cloud Infrastructure AI Foundations Associate](#) Certified by Oracle University for foundational AI and cloud integration concepts.
